

UAT: Renewals & Reminders (F8)

Test on the trial system (the administrator will provide the link and test accounts). · Follow each step on the live screen and compare with the Expected result. · Tick Pass / Fail and add evidence (document number / screenshot) for every step. · When done, sign off at the end of the document. · This set: 38 test cases.

Before you start (Preconditions)

- ☐ The relevant feature has been enabled for you by the system administrator
- ☐ You have several test members across multiple tiers (Thai alumni / Regular / Premium / Partnership) whose **expires_at** dates are spread across the 0–120 day range
- ☐ You have at least 1 member with **no expires_at** and 1 member with **no joined_at** (to test the separate tray)
- ☐ **Reminder schedules** are set up for all 5 tiers (with at least one tier having a T-30 step)
- ☐ You have at least 1 lapsed member, and 1 member with `blocked_from_auto_reactivation = true` who has an outstanding payment (for Pending review)
- ☐ F4 (invoicing) + F5 (online payment) are enabled, for testing the renewal + refund flow
- ☐ Two tenants are prepared (e.g. swecham + a test tenant) for testing cross-tenant isolation

How to fill in: For each TC, mark **Pass / Fail** in the "Result" field and add evidence (document number / screenshot) in the "Notes" field.

TC-REN-01 — Renewal pipeline shows members nearing expiry (1 / 38)

Role: admin

#	Step	Expected result
1	Open the Renewals menu (the staff-only page — paste its web address)	The "Renewal pipeline" page opens, showing the urgency tabs T-90...Lapsed + a table
2	Look at members expiring within 30 days	They appear under the T-30 tab (or shorter), sorted by expiry date from soonest to latest
3	Look at the columns on each row	There are Tier · Company · Expires · Urgency pill · Last reminder · Status · Invoice · button (•••)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-02 — Filter by tier and the link is shareable (2 / 38)

Role: admin

#	Step	Expected result
1	Select tier filter = Premium	The table shows only Premium members, without reloading the whole page
2	Look at the URL	It has a query parameter (e.g. ?tier=premium) — can be bookmarked / shared
3	Filter to a tier with no members in this window	The table is empty but the filter is still there (you do not get stuck in an empty state unable to clear the filter)

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-03 — Lapsed tab + reasons (3 / 38)

Role: admin

#	Step	Expected result
1	Click the Lapsed tab	You see a "Lapsed members" bar + a list of members who have passed the grace period
2	Look at the Reason column	There is a reason badge, e.g. "Grace expired" / "Payment failed"
3	Click button (⋮) → "Open cycle" (this menu also has "Mark contacted")	The cycle detail page for that member opens

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-04 — Pagination "Next 50" (4 / 38)

Role: admin · Condition: there are >50 rows in a single bucket

#	Step	Expected result
1	Open an urgency bucket with >50 members	You see "Showing first 50" + a "Next 50 →" button
2	Click "Next 50 →"	You go to the next page, keeping the same tier + urgency

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-05 — Cross-tenant isolation (must not see across organisations) (5 / 38)

Role: admin (test tenant)

#	Step	Expected result
1	Log in as the admin of the test tenant → open the staff-only renewals page (paste its web address)	You do not see any members of the swecham tenant at all
2	Open a cycle detail using a cycleId from another tenant (hand-crafted URL)	You get an "Not found" page (404) (no data leaks) + an entry in the history log for the cross-tenant probe

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-06 — Members with no expires_at / joined_at do not appear in the pipeline (6 / 38)

Role: admin

#	Step	Expected result
1	Look at the pipeline	Members with no expires_at and no joined_at do not appear in the urgency table
2	Check the history log (F9) for the cron run	The skip is recorded as a history-log entry renewal_skipped_no_joined_at — there is no tray/banner in the UI (the member is skipped silently); the admin must fill in the missing date in the member's record so they enter the pipeline

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-07 — Send reminder now (send immediately) (7 / 38)

Role: admin

#	Step	Expected result
1	On a pipeline row, click (⋮) → "Send reminder"	toast " Reminder sent " + "Email queued for delivery to <company>"
2	Check the destination email (test inbox)	You receive an email in the member's chosen language, with a "Renew now" link

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-08 — Re-sending a reminder is guarded (8 / 38)

Role: admin

#	Step	Expected result
1	Click "Send reminder" again on the same row (same step)	toast " Already sent <time> " — no duplicate email is sent
2	(If testing with 2 admins at once) the second person	Gets HTTP 409 + toast "Already sent <time>" (no duplicate send)

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-09 — Skip the reminder when a member has opted out / email_unverified (9 / 38)

Role: admin

#	Step	Expected result
1	For a member who has opted out of renewal reminders → click "Send reminder"	toast "Skipped — member opted out" (still stays in the pipeline)
2	For a member with email_unverified (bounced beyond the threshold) → click "Send reminder"	toast "Skipped — email is unverified"; the row has a hint saying the system has paused reminders

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-10 — manager has read-only access on the pipeline (10 / 38)

Role: manager

#	Step	Expected result
1	Log in as manager → open the staff-only renewals page (paste its web address)	You see the table + at-risk widget (read-only)
2	Click (•••) on a row → click "Send reminder"	The button is not disabled (it is clickable) but the API responds 403 + shows toast " Not authorized to send " (no email is sent; the system records a history-log entry f8_role_violation_blocked on the server side)
3	(Advanced) Send a direct POST to the staff-only send-reminder-now endpoint (paste its web address)	You get 403 + history-log entry f8_role_violation_blocked

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-11 — Cycle detail shows the full cycle information (11 / 38)

Role: admin or manager

#	Step	Expected result
1	Open the cycle detail	Cards for Member & plan, Linked invoice, Period & timeline, Activity
2	Look at the Plan card	Shows Frozen price / Term (months) / Currency (the frozen price)
3	Look at Activity	Reminder history + Escalation tasks for the cycle (if any)
4	Click "Show technical IDs" / "Show audit timestamps"	You can expand to see the UUID + timestamps

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-12 — At-risk widget appears + splits into bands (12 / 38)**Role:** admin

#	Step	Expected result
1	On the staff-only renewals page, scroll to the "At-risk members" widget	You see the tabs Warning · At risk · Critical (default is At risk)
2	Look at a row	Company · Risk score (with band) · Last computed · action button
3	If there are no at-risk members	It shows "All members healthy this week"

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	---------------------

TC-REN-13 — Snooze an at-risk member (admin only) (13 / 38)**Role:** admin

#	Step	Expected result
1	Click " Snooze " on a member row → select 30 days → " Confirm snooze "	toast "Snoozed for 30 days"; the member disappears from the widget
2	Wait for the snooze to expire (or check the logic)	The member returns to the widget (the score is still calculated in the background)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	---------------------

TC-REN-14 — Record outreach + pause reminders for 7 days (14 / 38)**Role:** admin

#	Step	Expected result
1	Click " Contact " → select a Channel (e.g. Phone call) → add a note → " Record outreach "	toast "Outreach recorded"
2	Try "Send reminder" for the same member within 7 days	It is skipped "Skipped — recent outreach already logged"

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	---------------------

TC-REN-15 — manager can record outreach but cannot Snooze (15 / 38)**Role:** manager

#	Step	Expected result
1	Log in as manager → open the at-risk widget	You see the "Contact" button but not the "Snooze" button
2	Click "Contact" → "Record outreach"	Saved successfully (a manager is allowed this by exception)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-16 — Members cannot see their own risk score (16 / 38)

Role: member

#	Step	Expected result
1	Log in as member → try to open the staff-only renewals page (paste its web address)	You are redirected out of the admin area (no access)
2	Check that no page/widget reveals the risk score to the member	The risk score is never shown to a member anywhere

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-17 — Tier upgrade queue: Accept (17 / 38)

Role: admin

#	Step	Expected result
1	Open the staff-only tier-upgrades page (paste its web address)	A table of Member · Current plan → Suggested plan · Reason · Status
2	Click (•••) → "Accept" → confirm in the "Accept tier upgrade?" box	toast "Tier upgrade accepted"; status becomes "Pending apply"
3	Check that the member's package does not change immediately	It changes at the next renewal cycle (no mid-year invoice is issued) + the member gets a notification email

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-18 — Tier upgrade queue: Dismiss (suppress for 90 days) (18 / 38)

Role: admin

#	Step	Expected result
1	Click (•••) → "Dismiss" → the "Dismiss tier upgrade suggestion?" box	Warning message "suppressed for 90 days. This action cannot be undone."
2	Confirm	toast "Suggestion dismissed"; status Dismissed; the cron does not suggest it again for 90 days

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-19 — Tier upgrade queue is admin-only (19 / 38)

Role: manager (and member)

#	Step	Expected result
1	Log in as manager → open the staff-only tier-upgrades page (paste its web address)	You are redirected to the staff-only renewals page (cannot access the upgrade queue)
2	Log in as member → try the same web address	No access (redirect/block)

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-20 — Escalation tasks: view the queue + overdue banner (20 / 38)

Role: admin

#	Step	Expected result
1	Open the staff-only tasks page (paste its web address)	The task queue with Open/Done/Skipped tabs, All/Mine/Unassigned, and a task-type filter
2	If there are tasks overdue by >3 days	A top bar "X overdue tasks" (click to filter to overdue only); overdue rows are highlighted
3	Look at tasks for a multi-year package	There is a "Year X of Y" label separating the years within the same cycle

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-21 — Escalation task: Done (21 / 38)

Role: admin

#	Step	Expected result
1	Click (•••) → "Done" → the "Mark task done?" box, add an outcome note (if any) → "Mark done"	toast "Task marked done"; the task leaves the Open tab

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-22 — Escalation task: Skip (a reason is required) (22 / 38)

Role: admin

#	Step	Expected result
1	Click (☹) → "Skip" → the "Skip task?" box, leave the reason blank then confirm	It is blocked "A reason is required before you can skip this task."
2	Enter a reason → "Skip task"	toast "Task skipped"; status Skipped

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-23 — Escalation task: Reassign (23 / 38)

Role: admin

#	Step	Expected result
1	Click (☹) → "Reassign" → select another staff member → "Reassign"	toast "Task reassigned"; the new assignee sees the task in their "Mine" tab

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-24 — manager can see the tasks queue but cannot act on it (24 / 38)

Role: manager

#	Step	Expected result
1	Log in as manager → open the staff-only tasks page (paste its web address)	You see the queue + the message "only admins can mark tasks done, skip, or reassign them."
2	(Advanced) Send a direct POST to done/skip/reassign	You get 403 ("Only admins can ...")

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-25 — Member self-service renewal: token → confirm → pay (25 / 38)

Role: member

#	Step	Expected result
1	The member clicks the "Renew now" link from the email	auto-sign-in + goes to the member renewal page, showing the package + frozen price + benefit summary + a "Confirm renewal" button
2	Click "Confirm renewal"	A renewal invoice (F4) is issued with the frozen price + redirect to the F5 payment page
3	Pay with a successful test card (F5)	The invoice becomes paid; expires_at moves forward by 1 year ; the cycle becomes completed; you are sent to the success page (title "Renewal complete" / subtitle "Thank you — your membership is active.") + a "Download

#	Step	Expected result
		receipt PDF" link *(note: the FR-023 welcome email is still deferred; if needed, raise it as an implementation gap, not a UAT pass criterion)*

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-26 — Member self-service: payment failed → schedule returns (26 / 38)

Role: member

#	Step	Expected result
1	On the payment page, make the payment fail (F5 test)	You are bounced back to the portal; the cycle is still awaiting_payment ; the invoice is still unpaid
2	Check the schedule	Reminders resume working (you will get the next scheduled nudge)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-27 — Lapsed member pays → auto-reactivate (default) (27 / 38)

Role: member (lapsed, not blocked)

#	Step	Expected result
1	The lapsed member opens the member renewal page	You see a message that the membership has expired and can be renewed to restore access (behavioural paraphrase — not an exact label) + the flow works
2	Pay successfully	The cycle changes from lapsed → completed ; access is restored immediately (auto-reactivate)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-28 — An expired / re-used renewal token is rejected (does not leak an oracle) (28 / 38)

Role: member

#	Step	Expected result
1	Click a link with an expired token (>30 days)	A generic error page "Your renewal link has expired. Please return to the portal and try again."
2	Click a link with an already-used token (replay)	The exact same error — it does not say

#	Step	Expected result
		whether the token was ever valid

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-29 — Cross-member probe is blocked (29 / 38)

Role: member

#	Step	Expected result
1	Member A opens the member renewal page using member B's id	You get an "Not found" page (404) + history-log entry <code>renewal_cross_member_probe</code> (cannot access another person's data)

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-30 — Pending review: Approve reactivation (30 / 38)

Role: admin

#	Step	Expected result
1	Open the staff-only renewals page (paste its web address) → the "Pending review" tab	You see cycles in <code>pending_admin_reactivation</code> (Member · Pending since · Expiry)
2	Click "Review" → go to the cycle detail page (the "Awaiting your decision" box)	You see the "Approve reactivation" / "Reject & refund" buttons (admin only)
3	Click "Approve reactivation" → "Approve"	toast "Reactivation approved — the membership is now active."; the cycle becomes completed; access restored

☐ PASS	☐ FAIL	Notes: _____
-------------------------------	-------------------------------	--------------

TC-REN-31 — Pending review: Reject & refund (a reason is required, cannot be undone) (31 / 38)

Role: admin · Condition: F5 is enabled

#	Step	Expected result
1	On the cycle detail (pending) click "Reject & refund" → leave the reason blank	It is blocked "Please enter a reason (1–500 characters)."
2	Enter a reason → click "Reject & refund"	toast "Reactivation rejected and the payment was refunded."; the cycle is cancelled + refund + a credit note is issued automatically
3	Check the warning message	There is "This action cannot be undone."

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-32 — Pending review is admin-only (manager can see but cannot act) (32 / 38)

Role: manager

#	Step	Expected result
1	manager opens the cycle detail of a pending cycle	You see a read-only page with no Approve/Reject buttons
2	(Advanced) Send a direct POST to approve/reject	You get 403 + history-log entry f8_role_violation_blocked

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-33 — Reminder schedules: edit + save (admin) (33 / 38)

Role: admin

#	Step	Expected result
1	Open Settings → Renewals → Reminder schedules	Tabs for all 5 tiers (Thai alumni...Partnership)
2	Select a tier → " Add step " and set Offset days + Delivery channel (Email/Task)	The step is added to the list
3	Click " Save schedule "	toast "Schedule for <tier> saved (+x -y =z)"; recorded in the history log

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-34 — Reminder schedules: manager read-only (34 / 38)

Role: manager

#	Step	Expected result
1	manager opens the Reminder schedules page	You see the message "You have read-only access to renewal schedules. Ask an admin to make changes."
2	Look for the Save/Add/Remove buttons	They cannot be used (read-only)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-REN-35 — Kill-switch turns off all of F8 (35 / 38)**Role:** admin · **Condition:** the relevant feature has been disabled by the system administrator

#	Step	Expected result
1	Open the staff-only renewals page (paste its web address)	It shows "The renewals workflow is not yet enabled for this chamber."
2	Open the staff-only cycle, tasks, and tier-upgrades pages (paste their web addresses)	You get an "Not found" page (404) on every page

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	---------------------

TC-REN-36 — Granular kill-switch: turn off only at-risk (36 / 38)**Role:** admin · **Condition:** the relevant feature has been disabled by the system administrator

#	Step	Expected result
1	Open the staff-only renewals page (paste its web address)	The at-risk widget shows "At-risk detection is temporarily unavailable."
2	Check the other sections (pipeline, send reminder, tier-upgrades, tasks)	They still work normally

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	---------------------

TC-REN-37 — Pipeline renders fast enough to target (perf) (37 / 38)**Role:** admin · **Condition:** preview + a large tenant (~5,000 active)

#	Step	Expected result
1	Load the staff-only renewals page (paste its web address) + switch tabs/filters on preview	p95 render < 500ms (measure for real, do not guess; SC-003 has an evidence test)

☐ PASS	☐ FAIL	Notes (the measured p95 value): _____
--------------------------------------	--------------------------------------	--

TC-REN-38 — i18n: switching language EN/TH/SV does not break (38 / 38)**Role:** admin

#	Step	Expected result
1	Switch the app language to TH then SV on every F8 page (pipeline, cycle detail, tasks, tier-upgrades, schedules)	Every label is fully translated, no MISSING_MESSAGE / raw keys
2	Check the dates in th-TH	They show the Buddhist Era alongside the Gregorian year (always stored as Gregorian)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

Summary & sign-off (F8 Renewals)
