

UAT: Dashboard, Audit & Export (F9)

Test on the trial system (the administrator will provide the link and test accounts). · Follow each step on the live screen and compare with the Expected result. · Tick Pass / Fail and add evidence (document number / screenshot) for every step. · When done, sign off at the end of the document. · This set: 36 test cases.

Before you start (Preconditions)

- ☐ The relevant feature has been enabled for you by the system administrator
- ☐ The relevant feature has been enabled for you by the system administrator
- ☐ F1–F8 data is ready: several members (with active / at-risk / overdue), invoices (paid + overdue), payments, broadcasts (some awaiting approval), event registrations, renewals — so the KPIs / feeds / timeline / benefits show real data to check
- ☐ At least 1 member has their directory listing set to **Listed** (some fields shown + email hidden) and at least 1 member who is **not Listed** — for testing the E-Book / JSON
- ☐ Working login accounts for admin, manager, and member (the member is linked to a member record that has data)
- ☐ (Isolation test) A second tenant, or a way to prove there is no cross-tenant leak

How to fill in: For each TC, mark **Pass / Fail** in the "Result" field and add evidence (document number / screenshot) in the "Notes" field.

TC-DASH-01 — Dashboard shows KPIs + revenue + freshness (1 / 36)

Role: admin

#	Step	Expected result
1	Log in as admin → open /admin	You see the real dashboard (not the roadmap placeholder)
2	Look at the Key metrics bar at the top	There are 4 KPIs: Total members / Active members / At-risk members / Paid revenue (YTD) — each has a label + a correct value matching the seed data
3	Check the revenue figure	Paid revenue (YTD) is in THB and matches the cumulative paid total for the year
4	Look below the page heading	Shows " As of {time} " (freshness of the snapshot, in the chamber's time zone)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-DASH-02 — Needs attention with counts + deep link (2 / 36)

Role: admin

#	Step	Expected result
1	Look at the Needs attention card	Shows only items with a value > 0: Overdue invoices / At-risk members / Broadcasts awaiting approval, each with a count
2	Click Overdue invoices	Goes to the Invoices page filtered to status=overdue

#	Step	Expected result
3	Click At-risk members	Goes to the Members page filtered to all 3 risk levels (critical, at-risk, warning) — not just one level
4	Click Broadcasts awaiting approval	Goes to the Broadcasts page

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-DASH-03 — Recent activity feed (near-real-time) (3 / 36)

Role: admin

#	Step	Expected result
1	First create a live event (e.g. record one payment) then return to /admin	The Recent activity card shows that event without waiting for the snapshot to refresh (the feed pulls live data)
2	Check the order	Sorted newest → oldest (reverse-chronological), with actor + action (label translated by language) + a relative time
3	Press Refresh	The feed updates (politely announced — does not steal keyboard focus)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-DASH-04 — Trend charts + data table for screen readers (4 / 36)

Role: admin

#	Step	Expected result
1	Look at the Trend charts section	There are Revenue trend (12 months) + Member growth (12 months)
2	Check each chart card	Shows a total summary (12-month total / Total members) + month labels; if there is no data yet it shows an empty/sparse label, not NaN
3	Check accessibility	Each chart has an equivalent data table (visually-hidden) and does not convey meaning by colour alone

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-DASH-05 — Smart insights + dismiss (5 / 36)

Role: admin

#	Step	Expected result
1	Look at the Smart insights card	Shows insights from the starter set (e.g. unused E-Blast quota / under-used event tickets / at-risk follow-up) with counts
2	Press Dismiss insight on one item	The item disappears (toast "Insight dismissed"); after refresh it does not come back (no need to wait for a scheduled job)
3	(If there are no insights)	The card shows "No insights right now — all clear."

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-DASH-06 — Manager sees the full dashboard (including revenue), read-only (6 / 36)

Role: manager

#	Step	Expected result
1	Log in as manager → open /admin	Sees the full dashboard, same as admin
2	Check Paid revenue (YTD) + the Revenue trend chart	Revenue is shown in full (manager is read-only on finance — can view money figures)
3	Look for any edit / finance drill-down button	None — F9 is a read-only page for all staff

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-DASH-07 — Member cannot enter the staff dashboard (7 / 36)

Role: member

#	Step	Expected result
1	Log in as member → paste the staff-only page web address directly	Access is denied — does not reach the staff dashboard (redirected back to portal / refused)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-DASH-08 — Empty state when the tenant has no data (8 / 36)

Role: admin

#	Step	Expected result
1	Open /admin on a freshly onboarded tenant (no data)	Every section (KPIs / needs-attention / feed / charts / insights) shows a friendly empty state — no error, no "0/NaN" artefact

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-DASH-09 — Feature off: page shows placeholder / "Not found" page (404) (9 / 36)

Role: admin

#	Step	Expected result
1	Turn the feature off → open /admin	You see the placeholder roadmap (F3–F6) instead of the dashboard (no error)
2	Open the staff-only audit page and the staff-only directory page (paste their web addresses)	Both show a "Not found" page (404)
3	(member) Open the member directory-settings page (paste its web address)	Shows a "Not found" page (404)
4	Turn the feature back on before testing the next TC	Dashboard / history log / directory are available again

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-AUDIT-01 — Filter the history log by event type + date range (10 / 36)

Role: admin

#	Step	Expected result
1	Open the staff-only history-log page (paste its web address)	The table shows the tenant's history, newest at the top
2	Set Event type = an existing role/tier change + a From/To range	Shows only events that match the type + fall within the range, sorted newest → oldest
3	Check the Event type options	All categories are present (member/invoice/broadcast/renewal/plan/event/auth/payment...), not just auth + payment

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-AUDIT-02 — Filter by target record (see every event for that record) (11 / 36)

Role: admin

#	Step	Expected result
1	Enter a Target record = one member	Shows every entry in the history log that references that record, no matter who performed it

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-AUDIT-03 — Export CSV of the filtered set + dual timestamp (12 / 36)

Role: admin

#	Step	Expected result
1	Set a filter (e.g. role changes for the whole year) → press Export CSV	Downloads a file containing exactly and only the filtered events
2	Open the file and check the timestamps	Has both UTC and a readable local time (unambiguous)
3	Go back to the staff-only history-log page and check that there is an "export" entry	Pressing Export is itself recorded in the history log

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-AUDIT-04 — Manager: redacted payload, sees the Actor (13 / 36)

Role: manager

#	Step	Expected result
1	Log in as manager → open the staff-only history-log page and find an event with a sensitive payload (e.g. override reason / staff note / another person's PII)	The sensitive fields in Details are redacted according to the manager's permissions
2	Check the Actor column	The actor's name is visible (actor identity is not redacted for managers)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-AUDIT-05 — History log is read-only (append-only) (14 / 36)

Role: admin

#	Step	Expected result
1	Browse the whole staff-only history-log page	There is no button/link to edit or delete any entry in the history log (read-only throughout)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-AUDIT-06 — Pagination + invalid filter (15 / 36)

Role: admin

#	Step	Expected result
1	In a result set with > 50 entries, press Load older events	Loads the next page appended below; does not freeze
2	Edit the web address to add a malformed from/to (e.g. from=99-99-99)	Shows an "Invalid filter" state (does not error / no blank page)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-TL-01 — Timeline merges all sources in time order (16 / 36)

Role: admin

#	Step	Expected result
1	Open a member with several sources → the staff-only member timeline page (paste its web address)	Merges invoice/payment/event/broadcast/history into one stream, sorted newest → oldest, with an icon/label per source (Profile/Audit · Invoice · Payment · Event · E-Blast · Renewal)
2	Compare against the real data	100% of the existing events appear, in the correct time order

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-TL-02 — Filter the timeline by source + date + long history (17 / 36)

Role: admin

#	Step	Expected result
1	Set Filters Source = Invoice + a date range	Shows only invoices in that range; press Clear filters to bring everything back
2	Set Actor = Staff/Member/System	Can filter by actor type
3	On a member with a long history (1,000+) scroll down / Load older activity	Loads more one page at a time, smooth, does not freeze the screen

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-TL-03 — Member sees their own timeline + redaction + no cross-person access (18 / 36)

Role: member

#	Step	Expected result
1	Log in as member → the member timeline page (paste its web address)	Sees their own history, in the same single stream

#	Step	Expected result
2	Check internal fields (override reason / staff note)	Redacted (do not appear)
3	Try to view another member's timeline (there is no address parameter to edit — it is resolved from the session)	No way to see anyone else's

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-TL-04 — A source with no data does not cause an error (19 / 36)

Role: admin

#	Step	Expected result
1	Open the timeline of a member where some source has no data (e.g. never had a payment)	The source with no data does not show an empty row / does not error — the stream shows only what really exists
2	A member with no activity at all	Shows an empty label ("No activity recorded yet.") and does not error

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-BEN-01 — Benefit usage: used/quota + last used + deep link (20 / 36)

Role: member

#	Step	Expected result
1	Log in as a member on a plan that gives E-Blast (e.g. 6 total, 2 used) → /portal/benefits	The Benefit usage · {year} card shows E-Blasts "2 of 6 used" + the date last used
2	Check the compose deep link	There is a link to compose an E-Blast (/portal/broadcasts/new)
3	Reconcile against the real data	The used/entitlement numbers match the actual consumption

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-BEN-02 — Under-use warning at the correct threshold (21 / 36)

Role: member

#	Step	Expected result
1	A member who is ~62% through the year but has used ~33% of benefits (gap ≥25 points)	Shows the warning box "You're not using all your benefits" + "At {x}% of the year you've used {y}%..." + a link to use the benefits
2	A member who is on track / has no countable	No warning box

#	Step	Expected result
	benefits	

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-BEN-03 — Unlimited benefits show as active, not as a quota (22 / 36)

Role: member

#	Step	Expected result
1	A member with an unlimited / active-only benefit (e.g. all-employee discount, directory listing)	Shows under Included benefits as present/active — not as a quota number

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-BEN-04 — Staff see benefits matching the member + a Send reminder button (opened via the Benefits button) (23 / 36)

Role: admin

#	Step	Expected result
1	admin opens the member benefits page (paste its web address) for the same member as TC-BEN-01	The used/entitlement numbers match exactly what the member sees
2	Check the staff-only button	There is a Send reminder button (opens a mailto to the primary contact) — present only when the member has an active primary contact

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-BEN-05 — Quota resets at the start of a new year (24 / 36)

Role: member or admin

#	Step	Expected result
1	View the current year's benefits (calendar year in the chamber's time zone)	The quota reflects the current year's entitlement; last year's usage is not counted into this year

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-DIR-01 — Search the internal directory by keyword + tier (25 / 36)**Role:** admin

#	Step	Expected result
1	Open the staff-only directory page (paste its web address) → search by keyword (company/industry/description) + filter Tier	Shows matching members, with columns Company/Tier/Industry/Location/Listed/Logo/Contact
2	Check the scope	Staff see all members in the search (including those not Listed)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-DIR-02 — Generate the E-Book (PDF): opt-in members only + chosen fields only (26 / 36)**Role:** admin

#	Step	Expected result
1	Press Generate E-Book (PDF)	toast "Generation queued..."; the Recent exports card shows a new job with status Queued → Generating → Ready
2	Press Download when Ready	You get a nicely formatted PDF with chamber branding, rendered in the tenant's default language (EN)
3	Check the contents	Includes only members who are Listed and only the fields each one chose to show — members who are not Listed do not appear

☐ PASS	☐ FAIL	Notes (job number / screenshot): _____
--------------------------------------	--------------------------------------	--

TC-DIR-03 — Export JSON: correct structure + respects field hiding (27 / 36)**Role:** admin

#	Step	Expected result
1	Press Export data (JSON) → wait for Ready → Download	You get a JSON file with a nested structure suitable for a website to use
2	Check a member who hides their email	The email is omitted (or replaced with a contact-form indicator) in the file
3	Check the list of names	Includes only opt-in listings + only the chosen fields

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-DIR-04 — Member sets their directory listing (opt-in + fields + logo) (28 / 36)

Role: member

#	Step	Expected result
1	member → /portal/profile/directory	The default for List my organisation... = off (private), Contact email = hidden
2	Turn on Listed + tick fields + fill in details → Save	Saves successfully ("Directory listing saved.")
3	Upload logo a PNG/JPEG/WebP file ≤2 MB	Uploads successfully (re-encode + strip EXIF); try a file >2 MB / wrong format → shows the correct error
4	(verify) admin generates a new E-Book/JSON	This member appears as just configured (old files do not change — you must generate again)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-GDPR-01 — Member requests an export of their own data (29 / 36)

Role: member

#	Step	Expected result
1	member → /portal/account#data-privacy → press Request my data export	Status Preparing → Ready to download
2	Press Download	You get an archive containing your own profile/contacts/invoices(+PDF)/events/broadcasts/history-events + README + manifest.json
3	Check the manifest	manifest.json has a checksum (SHA-256) for every file — validates correctly

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-GDPR-02 — Download link expires + recorded in the history log (30 / 36)

Role: member

#	Step	Expected result
1	After Ready, leave the download link untouched past the time window (~1 hour)	The link expires (status Expired) — you must request the export again
2	Check the staff-only history-log page	There are entries recording both the request and the delivery of the export

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-GDPR-03 — Admin issues an export on behalf of a member + attribution

(31 / 36)

Role: admin

#	Step	Expected result
1	admin opens the staff-only member page (paste its web address) → the Data export (GDPR) card → Request my data export	Creates the same kind of archive the member would get
2	Check the staff-only history-log page	The action is attributed to this admin as the issuer
3	(if applicable) An archived member	Export still works (the right to portability remains)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	---------------------

TC-GDPR-04 — Member must not export another person's data (32 / 36)**Role:** member

#	Step	Expected result
1	A member tries to request/download another member's export (the memberId is resolved from the session only)	Denied — can only export their own data

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	---------------------

TC-ENG-01 — Engagement score: shown/sorted/filtered in the members list

(33 / 36)

Role: admin

#	Step	Expected result
1	Open /admin/members and look at the Engagement column	Shows a score + band (Healthy/Moderate/Watch/Critical) with a text label, not relying on colour alone
2	Click the Engagement column header to sort	Sorts correctly (default DESC = healthiest first); inverse of at-risk (F8)
3	Check the member side	A member does not see the engagement score (staff-facing only)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	---------------------

TC-ISO-01 — Tenant isolation (no cross-tenant leak) (34 / 36)**Role:** admin

#	Step	Expected result
1	On every F9 page (dashboard/audit/timeline/directory/export) check that the data belongs only to the current tenant	No data from another tenant appears at all
2	(If possible) Try a cross-tenant probe, e.g. edit an id in the web address/filter to point at another tenant	Returns zero records and the attempt is recorded as an auditable probe

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-I18N-01 — All 3 languages + Buddhist Era + no missing strings (35 / 36)

Role: admin + member

#	Step	Expected result
1	Switch language EN / TH / SV on every F9 page	Fully translated, no MISSING_MESSAGE / raw key appears
2	In TH, check the dates	Shows the year in B.E. (Buddhist Era) for the user, but storage is still Gregorian UTC
3	Check the KPI cards / audit columns / directory listings in TH/SV (strings longer than EN)	No bad word breaks / no overflow (handles content-length variance)

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

TC-A11Y-01 — Accessibility on F9 pages (36 / 36)

Role: admin

#	Step	Expected result
1	Navigate by keyboard only on dashboard/audit/directory	Fully usable, with skeleton/empty/error states, filters have labels, error messages are announced
2	Check the Engagement band / benefit level	Does not convey meaning by colour alone (also has text/icons — WCAG 1.4.1)
3	Switch light/dark (prefers-color-scheme)	Every F9 page respects the theme, does not hard-code a single scheme

i For the real run: the @a11y gate is **preview-only** — local dev may have noise (320px reflow / target-size) that is not a regression; run the decisive check on the preview deploy

☐ PASS	☐ FAIL	Notes: _____
--------------------------------------	--------------------------------------	--------------

Summary & sign-off (F9 Insights)

Item	Value
Total number of TCs	36
Passed	_____
Failed	_____ (list TC numbers: _____)
Run on (preview URL)	_____
